

# Johnsons Textile Services Limited

## Gender Pay Gap Report 2023/24

### BACKGROUND

Under legislation that came into force in April 2017, all UK companies with 250 or more employees must publish and report specific figures about their gender pay gap. The legislation therefore applies to Johnsons Textile Services Limited (the “Company”), a wholly owned subsidiary of Johnson Service Group PLC (the “Group”), which for the period under review employed the vast majority of the Group’s UK-based employees.

Employers must publish the gap in pay between full-pay men and women on both a mean basis (average hourly salary) and a median basis (pay per hour based on the person ‘in the middle’ of the distribution of pay). In relation to bonus pay, employers are required to disclose both a mean and median basis for average bonus pay received in the financial year 2023/24. Furthermore, the percentage of employees receiving bonuses by gender must be disclosed. In addition, employers are required to disclose the distribution of gender by pay quartile – in other words, splitting the workforce into four groups based on their pay and showing the proportion of men and women in each group.

The ‘Gender Pay Gap’ calculations relate to the pay period in which the snapshot date, 5 April 2024, falls for each full-pay relevant employee only. The ‘Gender Bonus Gap’ calculations relate to the period 6 April 2023 to 5 April 2024 for all relevant employees.

### GENDER PAY GAP

The Company provides the following information in respect of its Gender Pay Gap:

Difference in the hourly rate of pay (mean)	<b>7.6%</b>
Difference in the hourly rate of pay (median)	<b>6.5%</b>

## GENDER BONUS GAP

The Company provides the following information in respect of its Gender Bonus Gap:

Difference in bonus pay (mean)	<b>36.8%</b>
Difference in bonus pay (median)	<b>0.0%</b>
Percentage of male employees who receive bonus pay	<b>12.0%</b>
Percentage of female employees who receive bonus pay	<b>15.3%</b>

## DISTRIBUTION OF MALE AND FEMALE EMPLOYEES BY QUARTILE

The proportions of male and female full-pay relevant employees in the lower, lower-middle, upper-middle and upper quartile bands were as follows:

## FURTHER EXPLANATORY COMMENTARY

The results do show that, as in previous years, there is a gender pay gap. Whilst having fewer females than males in senior and leadership roles has an impact on our gender pay gap, it is also significantly influenced by two industry related factors:

- 1) laundries operate large transport fleets and hence employ a significant number of drivers. The role generally commands a higher pay scale and is predominantly populated by males; and
- 2) laundry operations are very labour intensive with such roles being predominantly in the lower quartiles. A higher proportion of these roles are currently performed by females.

The Company strives to ensure that it provides a workplace where all our people feel valued and equal and we continue to take action to address the gap and to make sure our employment policies and practices are fair. This includes actively reviewing decisions around annual pay, bonus pay and promotion opportunities and the Company will continue to endeavor to provide a training and development platform for all individuals to grow, both personally and in their work role, irrespective of gender.

## **DECLARATION**

We confirm that our data is accurate and has been calculated according to the requirements of the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017.
